Proficient: JavaScript, Node.js, Express.js, Sequelize, MongoDB, React, Redux, Git/Github, PostgreSQL, CSS, HTML, Functional Programming, Object-Oriented Programming (OOP), Responsive Design, RESTful API

Familiar: Passport.js, Webpack, Socket.io, Babel, TDD (Mocha, Chai, Jasmine), Travis CI, Heroku, Data structures & Algorithms, Agile Methodologies

SOFTWARE PROJECTS

Decepticons (github.com/decept1cons/Graceshopper)

- Developed eCommerce website offering with plp and google login that allows user to purchase automobiles
- Incorporated persistent storage to allow for future access of guest shopping carts with localStorage
- Designed RESTful backend server enabling previous orders to be stored in database
- Utilized Node.js, Express, PostgreSQL, Sequelize, React, Redux, GIT, agile methodologies, and localStorage

EZSplit (github.com/EZSplit)

- Created a mobile responsive web app that itemizes receipts and allows users to select items for payment
- Incorporated Socket.io to provide a realtime customizable table between parties
- Added functionality to add users to multiple friends lists via a QR code feature which is stored in the database
- Utilized Node.js, Express, PostgreSQL, MongoDB, React, Redux, CSS, GIT, agile methodologies, Taggun.io, Socket.io, and QR reader

EMPLOYMENT

Citigroup Global Markets Inc.

January 2018 - October 2018

Sr. Associate, Private Banking/Advisory

New York, NY

- Reduced team inquiry volume for a portfolio of 50 plus high-net worth clients with AUM of more than 200 million dollars by proactively updating clients on financials
- Spearheaded account remediation issues with sales and operations/product teams to ensure procedures comply with banking and trading policies by raising awareness of possible overdue margin loans, capital calls, and overdrafts ahead of time
- Piloted new client onboarding by reaching out and walking client through Citi policies to ensure transparency and seamlessness moving forward

June 2015 - January 2018

Associate, Trade/Product Support

New York, NY

- Integrated new team members by providing in-depth training and mentorship on topics such as product and brokerage platform usage
- Optimized team workflow by acting as a subject matter expert and main point of contact on in-house investment products and portfolio allocations
- Leveraged knowledge on asset movements, account activity (including margin and cost basis), and retirement account policies to provide advise and rectifying client account discrepancies

EDUCATION

Fullstack Academy of Code

April 2019

Immersive Software Engineering

CUNY Baruch College

May 2015

Bachelor of Arts in Economics
